

## Gondola Photo Retouching

### 1. Crop

Click on the Crop Tool  
3.75 inches Wide by 6 inches high

### 2. Adjust Tonal Range

Image > Adjustments > Levels  
Move left and right triangles in

### 3. Remove Color Cast

Layer > New Adjustment Layer > Color Balance  
in Color Balance dialog box: Top slider to -15,  
Middle to +8

### 4. Replacing Color

Background layer active  
Select Rectangle Selection Tool and drag a selection around the orange tarp on the bottom right corner.  
Image > Adjustments > Replace color  
Fuzziness to 61  
Use Eyedropper-plus and click on tarp until it shows as white in the dialog box.  
In the Transform area of Dialog box, drag Hue to 149, Saturation to -17, Lightness to -39  
Deselect

### 5. Adjust Saturation with Sponge

Select sponge tool (behind Dodge tool)  
In the Options Bar at top of screen choose Saturate with a Flow of 90  
Soft Fuzzy brush  
Drag Spoinge over Stripes on Gondola

### 6. Remove Unwanted Objects

Select Rubber Stamp Clone tool  
Center Clone Stamp tool between gondola and post, hold OPTION key and click once to define a source point.  
Drag Clone Stamp tool over boat to remove it

### 7. Replace part of an image

Select Sky with Magic Wand Tool  
Open AClouds.psd, select all, copy, then close clouds file  
Edit > Past Into  
Use Move tool to drag clouds into position you want  
Change opacity of cloud layer to about 55%

### 8. Save as: AA your name

Evaluation:  
Correctly Followed Directions, 10 points
